HC460 - LM ▼

AngelTrax's Hybrid Component is the most reliable, accessible, durable and cost-efficient mobile DVR available to date. The HC460 - LM comes standard with up to four channels and a 256GB solid state hard drive. It is also completely field serviceable due to its unique removable component design. This means that once the Hybrid is installed, any repair, upgrade to new technology or hard drive retrieval can be accomplished within minutes without ever removing the DVR unit. The Hybrid Component is an investment that will slash the cost of long term ownership in half.

Features ▼

- Solid state hard drive
- Comes standard with four channels
- DVD quality playback
