

FlexPlay™

AngelTrax PC Mobile DVR Playback Software

Product ▼

FlexPlay is the best software solution for video data playback. AngelTrax developed FlexPlay™ to simplify the video data retrieval process by enabling the user to access their video footage in a matter of seconds. FlexPlay™ features a four channel video display, selectable audio playback and an incredibly user friendly interface. Simply connect the hard drive to your computer, sit back and watch as FlexPlay™ automatically opens and plays your stored video data.

FlexPlay™ practically thinks for you by instantly retrieving the first day of video data on the hard drive and displaying it on the player for viewing. FlexPlay™ allows for an accelerated search of events by emergency, date and time. It has easy to use image and video archiving features that utilize standard JPEG and AVI file formats. FlexPlay™ comes with a convenient Blur Feature that allows you to conceal innocent individuals in order to protect their privacy. FlexPlay™ can be used to view footage from the AngelTrax HC460.
